CPVC ADJUSTABLE DROP CLAMP

PATENTED

**Allows for sprinkler head adjustment after ceilings have been installed.
No cutting and patching of drywall needed!**

- Solidly supports vertical CPVC pipe.
- Allow adjustment of drop nipples through small ceiling openings.
- Stops movement of sprinkler head and escutcheon due to thrust created by sudden excessive pressure changes, contraction and expansion, and other mechanical forces.
- Eliminates problems caused due to small dimensional errors or accidental movement by others.

All components of durable steel and plated to eliminate corrosion and electrolysis.

Double Wedge configuration assures mechanical advantage for ease of release and make up.

Sizes Available: 3/4" & 1" CPVC and Steel

FOR 3/4" AND 1" CPVC PIPE ONLY.
