

DROP NIPPLE RATCHET TOOL

Fire Sprinkler Fitters Best Friend.

Exclusive new tool designed to help installers in resizing fire sprinkler drops in Hard Lid Ceilings.

Replace old recessed or pendent type sprinklers with new concealed type fire sprinklers.

- Save time and money
- Fits cast, ductile & malleable reducing couplings
- Avoid ceiling patch or repairs
- Safer than traditional methods
- Extended height makes it easy to reach well above ceiling
- Ratchet allows for work in tight corners

How it Works:

After the old sprinkler head has been removed, thread the wrench to the reducing coupling and remove drop.

Cut the sprinkler drop back to desire height, or replace nipple at desired length.

Screw reducer onto the drop tool.

Using the drop tool, reach above ceiling to the drop nipple and thread and tighten with ratchet.

Remove tool and install the new concealor sprinkler.

Kit Includes:

- Ratchet Wrench with handle
- 1/2" threaded female drive shaft
- 1-1/4", 1-3/8", 1-1/2", 1-5/8" Hex Sockets
